Message from the Guest Editor

Dear Colleagues,

In December 2018, the United Nations General Assembly declared 2020 as the International Year of Plant Health (IYPH)—a “once in a lifetime” opportunity to raise global awareness on the importance of plant health.

This Special Issue is dedicated to news and innovations related to both forests and forest tree fitness and health from a socio-ecological perspective.

The main topics are: pest risk assessment and management, the trade of plants and plants parts, soil ecology including fertility and root symbioses, alien pests and parasites, integrated pest management, genetic selection, statistics and forecasting models, and biosecurity including citizen science.

Papers on new survey protocols, diagnostics, epidemiology, and environmentally friendly control methods are welcome.

Dr. Lucio Montecchio
Guest Editor

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), Ei Compendex, GeoBase, Scopus and other databases.

CiteScore (2018 Scopus data): **2.32**, which equals rank 20/139 (Q1) in the 'Forestry' category.
